

UCOWR Water Seminar

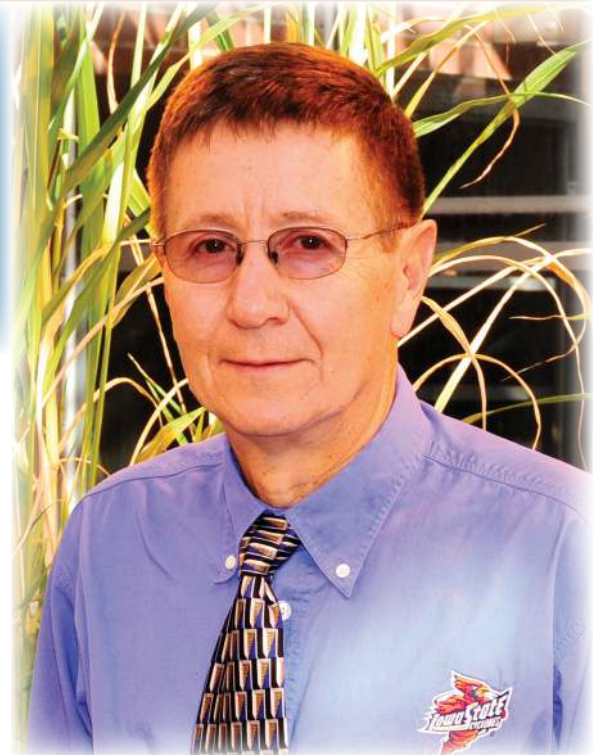

SOIL AND WATER:

Resources with

Decreasing Life Expectancy?

Dr. Richard Cruse

*Director of Iowa Water Center, Professor of
Agronomy, Iowa State University*

Thursday

April 7, 2016, 4:00pm

Guyon Auditorium

Morris Library

Free and open to the public

“Rigorous scientific evidence indicates soil and water are being degraded globally at rates that pose serious threats to food security. The interactions of rising population, accelerating food and especially meat demand, rising living standards, loss of agricultural land, and changing climate when linked with degrading soil and water resources bring into focus serious impending food security challenges mostly unrecognized.”
